

# SPIROVIT SP-1 G2

Portable spirometer with ultrasonic technology  
Innovation for optimal lung care

# SPIROVIT SP-1 G2

SCHILLER's SPIROVIT SP-1 G2 is the all-in-one solution in lung function testing – portable/ desktop spirometry for large and small healthcare providers.

- Ultrasound technology: calibration-free, no warm up time, no moving parts.
- Real-time information on colour LCD

## ULTRASOUND TECHNOLOGY

Thanks to GANSHORN's ultrasound technology, recordings are highly accurate and the sensor is maintenance- and calibration-free. Furthermore, the system is independent of gas composition, air pressure, temperature and humidity. The disposable ScoutTubes ensure maximum hygiene and patient safety.

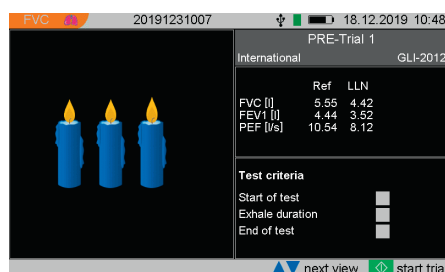

## DISPOSABLE AND SUSTAINABLE

To ensure a sustainable product, SCHILLER compensates the CO<sub>2</sub> emitted during production, packaging, shipment and disposal of the ScoutTubes.

## REAL-TIME DISPLAY

The large colour LCD helps to ensure that the patient achieves a good result and the measurement is valid: information is displayed in real time, the spirometer provides feedback on the procedure's quality after each trial and an incentive screen is available for trials with children.

Incentive screen for paediatric spirometry

## WIDE RANGE OF MEASUREMENTS INCLUDING INTERPRETATION

The spirometer offers FVC, SVC and MVV. Moreover, Pre and Post tests are possible. The SPIROVIT SP-1 G2 automatically interprets the results and provides information on a possible diagnosis. Results can be printed on site, using the integrated thermal printer.

## AVAILABLE WITH TROLLEY

The SPIROVIT SP-1 G2 offers the major advantage of being able to perform spirometry wherever you are, without a PC. For added convenience, the system is also available with a trolley, which includes a bin for consumables such as ScoutTubes.
